DETAILED ACTION

This office action is in response to the amendment and remarks filed 11/8/2006. Applicant's election without traverse of the species II in the reply filed on 11/8/06 is acknowledged.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 98 and 99 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 54 and 55 of U.S. Patent No. 6,398,511. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 98 and 99 of the instant application are anticipated by claims 54 and 55 of the patent.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 98-106 are rejected under 35 U.S.C. 102(b) as being anticipated by **Cook et al.** (US 4,682,801).

Cook discloses the elements as claimed. Specifically, **Cook** shows an electrical circuitry operable to selectively couple the coil to a power source to enable current to flow from a power source through the coil in a first direction (cl. 3 ll. 54-59) and to selectively couple the coil to the capacitor to enable current to flow from the capacitor through the coil in a second direction (cl. 3, ll. 63 to cl.4, ll. 2). Also, **Cook** shows the electrical circuitry is operable to selectively couple the capacitor to the power source to charge the capacitor (cl.3, ll. 53-62). Further, **Cook** shows the electrical circuitry couples the capacitor to the power source through the coil to charge the capacitor (particularly Figure 3, cl.3, ll. 60-62). Yet further, **Cook** shows the electrical circuit comprising the capacitor (cl.3, ll. 62). **Cook** shows the electrical circuitry comprises electronic switching devices operable to selectively complete and open conductive paths between the power source, coil and capacitor (cl. 4, ll. 31-35).
